

PROVIDING LAW ENFORCEMENT ACCESS DURING EMERGENCY SITUATIONS

Dedicated KnoxBox programs are now available for law enforcement agency use during active shooter incidents and other hostile events that warrant rapid access into locked doors.

QUICK ENTRY

- Single-key for multiple agencies and jurisdictions (i.e. one key for all the schools in a county)
- Provides access to locked external/internal doors and gates
- Eliminates precious time waiting for breaching equipment, or arrival of a facility key holder
- KnoxBoxes provide secure storage of master keys, access cards, and floor plans

STRATEGIC INSTALLATION

- Enables access for tactical response
- Install options tailored to fit individual needs

SAFE AND SECURE

- KnoxConnect provides audit trail records, usage data, and deactivates lost or stolen keys
- Boxes have passed UL's rigorous security testing and are listed to four certifications
- Eliminates forced entry and costly property damages; and reduces potential injuries to personnel (lowering workers comp claims)

FLEXIBLE AND EASY TO IMPLEMENT

- Customizable with capacity to expand for future growth and needs
- No batteries or power required
- Maintenance-free
- Cost-effective access solution for vulnerable targets (schools, government buildings, places of worship, movie theaters, etc.)

NOTE: In most jurisdictions, access to schools during hostile events removes concerns about search and seizure violations. **Review with legal counsel to confirm applicability.**

ABOUT THE KNOX COMPANY

Since 1975, the Knox Company has successfully developed innovative rapid access solutions for first responders with products that provide fast, safe, and secure entry into commercial, industrial, educational, and residential properties.
